## Let It Rain Nichkhun Horvejkul

After listening to the song over and over and watching the live performances I came to this. Everything else is part in terms to make it easy. It is just four easy chords. Placed the chords in its original key, but transpose to an easier key if you like. So I figured the walk-downs and instrumentals, but the instrumentals are a little tricky and it was the best I could tell apart from the lead parts and bass riffs. This is how I played it and it made sense to me.
