

Last December
Nina Nesbitt

C
You were different to anyone i've ever known

G
Used to have a tendency to drink alone

Am
But when i met you i felt like i wanted

F
To save you somehow

C
I loved the way that you always put me first

G
You gave me your best and i gave you my worst

Am
Took it for granted because i couldn't see

F
Why you'd let me in just to get hurt

G **C** **F**
But moments stay when people leave

G **C** **F**
And I can say that i still remember when

C
I met you there with a nervous smile

G
And i left knowing you'd be here a while

Am
I loved last december

F
Don't think that i don't remember it all now

C
Drinking mulled wine and seeing the lights

G
You lit up london in my eyes

Am
I loved last december

F
Don't think that i don't remember it all know

C
We sat in the graveyard, talking about life

G
Drove for days and played under different lights

Am
Then we'd run off, with enough love to

F

Keep us up for nights

C

You were the safety blanket i needed most

G

But you were always so anxious

Am

Of my ghosts that came at night

F

From my past life

G

C

F

But moments stay when people leave

G

C

F

And I can say that i still remember when

C

I met you there with a nervous smile

G

And i left knowing you'd be here a while

Am

I loved last december

F

Don?t think that i don?t remember it all now

C

Drinking mulled wine and seeing the lights

G

You lit up london in my eyes

Am

I loved last december

F

Don?t think that i don?t remember it all know

G

Am

Late nights and buses, laughing and running

F

Never making the last train in time

G

Am

Kissing and fighting, till i would start crying

F

Cause you were so drunk out your mind

C

I met you there with a nervous smile

G

I left you here with nothing but

Am

Memories of december

F

Now it?s all i remember yeah

C

Drinking mulled wine and seeing the lights

G

You lit up london in my eyes

Am

I loved last december

F

Don?t think that i don?t remember it all now

Am

Cause it?s all i remember

F

But that was last december

C

And this is now
