

## No Easy Way Down

Norah Jones

**C**                                **Em**                                **Dm**    **G**  
Your toy balloon has sailed in the sky, love  
**C**                                **Em**                                **F**  
But now it must fall to the ground  
                             **C**                                **F**                                **C**                                **F**  
And your sad eyes reveal just how badly you feel  
                             **C**                                **Em F Dm**                                **G**  
And there is no easy way down

The view from the cliffs must have been exciting  
And up to the peaks you were bound  
Now you re stranded alone and the path is unknown  
                             **C**                                **Em F Dm**                                **A**  
And there is no easy way down

**C**                                **Bb**    **C**    **Bb**  
No, it isn t very easy when you find yourself out on your own  
**C**                                **Bb**    **C**    **Bb**  
Hey, it isn t very easy when each road you take is one more mistake  
   **C**                                **Bb**    **G**  
And there s no-one to break you fall and leads you back home

We all like to fly to the heights, love  
Where our fantasy worlds can be found  
You must know it s the end when it s time to descend  
And there is no easy way down  
And there is no easy way down
