

**Revolution Song**  
**Oasis**

**D**                      **A**  
They took my faith  
         **Bm**                      **A**                      **D**  
They put it in a headlock and  
                         **A**  
They sealed my fate  
**Bm**                                      **A**                                      **D**  
Somewhere inside of the world in which they live

Because I failed  
They constantly ignore me and  
They told me I lost my mind  
But I believe that I rule the world

**Em**                                      **A**  
Singing out my revolution song like nothing else matters  
**Em**                                      **A**  
You can pitch your gold against my soul but I bet you get shattered  
**Em**                                      **A**  
There s a million houses in my home  
                         **D**                      **A**  
It won t be long  
                         **Bm**                      **G**  
It won t be long  
                 **Bm**                      **A**                      **D**  
Til I solve my mystery

What for me?  
What do I believe in? and  
The master key  
Is somewhere inside of the world in which I live  
And what for they?  
They will speak for no one and  
I may have lost my mind  
But I believe that I rule my world

Singing out my revolution song like nothing else matters  
You can pitch your gold against my soul but I bet you get shattered  
There s a million houses in my home  
It won t be long  
It won t be long  
Til I solve my mystery

And I m singing out my revolution song like nothing else matters  
And you can pitch your gold against my soul but you re gonna get shattered  
There s a million houses in my home  
It won t be long

It won't be long

**G**       **Bm**

Til I solve my mys.....

**A**                      **D**

Til I solve my mystery
