

Satellite
OceanLab

Oceanlab - satellite
(very easy song, enjoy! akin kurtoglu)

Am **G** **F**
My love is like footsteps in the snow, baby,
Am **G** **F**
I follow you everywhere you go.
Am **G** **F**
The pain as light has come to wake you But you will never realize
Am **G** **F**
I inspire the dreams that guide you baby.

Chorus:

F **Am**
You re a half a world away
F **Am**
But in my mind I whisper every single word you say.
F **Am**
And before you sleep at night
F **Am** **G** **F**
You pray to me, your lucky star, you re singing satellite.

(Repeat Verse Progression)
I follow the winds that bring the cold, baby,
I light a fire in your soul.
The lightest touch of feathers falling My love may be invisible
But I inspire the dreams that guide you, baby

(Repeat Chorus Progression)
You re a half a world away
But in my mind I whisper every single word you say.
And before you sleep at night
You pray to me, your lucky star, your singing satellite.
