

Apple Moon
Odeath

I am sick of the lack of Odeath tabs here! The lyrics may be a little wrong, but the chords should be right.

[Verse]

Am **F**
Where, O where will I turn
G **Am**
Into something that s real?
Am **F**
I m not buried in soil
G **Am**
I just lost how to feel

Am **F**
I choose to breathe
Em **Am**
In the place where I m torn

Am **F**
Why on earth am I bound?
G **Am**
Why does time make me old?

Am **F** **E** **F**
I ll walk away and bring back what I found

Am **F**
Looking up past the clouds
G **Am**
On a hill facing noon
Am **F**
Never swim when you re blown away
G **Am**
Never made, never drown

[Pre-Chorus]

Am **F** **E** **F**
I ll look away like others of us do
E **F**
And leave the stars ~till dawn

[Chorus]

Am **C** **G** **Em**
In your absence a seedling grew
Am **C** **G** **Em**
I got raped by the apple moon
Am **F**

There wasn't anywhere

G E

That I could come back to

Am C

When I touch the ground

G Em

I know it's true

[Verse]

Am F

Like a film in its reel
