Were All In This Together Old Crow Medicine Show

Capo 2

[Verse]

C E F

Well my friend, I see your face so clearly

Am G

Little bit tired, little worn through the years

C E F C

You sound nervous, you seem alone

Am G

I hardly recognize your voice on the telephone

In between I remember

We drive out to the edge of the highway

Just before we wound up broken-down

Bell with the same sage of one mightag

Follow that lonesome dead-end road sign south

[Chorus]

C E F C

We re all in this thing together

Am G

Walkin the line between faith and fear

C E F C

This life don t last forever

Am G

When you cry I taste the salt in your tears

[Verse]

Come my friend, let s put this thing together And walk the path our worn out feet have trod If you want, we could go on forever Give up your jaded ways, spell your name to God

[Chorus]

C E F C

We re all in this thing together

Am G

Walkin the line between faith and fear

C E F C

This life don t last forever

Am G

When you cry I taste the salt in your tears

[Verse]

All we are is a picture in a mirror

Fancy shoes to grace our feet

All there is is a slow road to freedom

Heaven above and the devil beneath

[Chorus] C E We re all in this thing together Walkin the line between faith and fear C E F C

This life don t last forever

When you cry I taste the salt in your tears
