Intro: **Bbm**

Bbm   **G#**
 Dear darlin , please excuse my writing
                                  Ebm
 And I can t stop my hands from shaking
                              Bbm
  Cause I m cold and alone tonight

Bbm   **G#**
 I miss you and nothing hurts like no you
                                      Ebm
 And no one understands what we went through
                              Bbm
 It was short, it was sweet, we tried

          F#
 And if my words break through the wall
      G#
 And meet you at your door

                  F#   **G#** **G#4**
 All I can say is Girl, I mean them all

I was warm in the hope of your eyes
