Olly Murs

Intro: E   B   C#m   A

```
            E                   B
There s a word that would hurt
       C#m           A
I can feel on your lips
          E          B
Like a gun to my heart
               C#m           A
When all that I want is a kiss
```

```
         E
But we fell so hard and it felt so right
     B
So don t let it all end here tonight
      C#m                        A
And we could fall all over again
```

```
               E
Don t say goodbye
            B
Keep us alive
         C#m                          A
Cause my world will stop if we didn t try
               E              B
Can t we pretend just for tonight
             C#m                              A
Cause those words would tear the stars from the sky
