

Outside

Ou Est Le Swimming Pool

It s going to be really rough because I haven t been playing guitar long. It doesn t sound dead on but ,I had to find something that worked on guitar. I just wanted something that people could work from as a baseline to improve it. Lyrics are ear transcribed as I couldn t find official ones! The chords might be a bit jumbled as well but the point is its sounds quite good with the 4 chords listed.

Also my first tab!

No capo in this version, but I haven t experimented to see if it would sound better with one.
