When the Moon fell in love with the Sun  
          **G**          **E**      **Am**  
All was golden in the sky  
          **G**          **E**      **Am**                  **G**  
All was golden when the day met the night

**G**                  **Am**  
When the Sun found the Moon  
                          **Em**                          **G**  
She was drinking tea out in a garden  
          **Am**                          **Em**  
Under the green umbrella trees  
                          **G**  
In the middle of summer

**G**                  **Am**  
When the Moon found the Sun  
                          **Em**                          **G**  
He looked like he was barely hanging on  
          **Am**                          **Em**  
While her eyes saved his life  
                          **G**  
In the middle of summer

**G**      **Em Am**  
In the middle of summer  
                          **G**      **Em Am**  
In the middle of summer  
                          **G**      **Em**      **Am**  
In the middle of summer (oh oh oh oh)

**G**  
Well, he was just hanging around  
                          **Am**  
Then he fell in love  
  
And he didn't know how  
                          **Em**  
But he couldn't get out  
  
  **G**      **Em**      **Am**  
Just hanging around and he fell in love

**G**      **Em Am**
