Well i spent my money  
          **G**  
I lost my friends  
          **C**                    **F**  
I broke my mobile phone  
                  **G**  
3am and i m drunk as hell  
          **C**                    **F**  
And i m dancing on my own  
                  **G**                    **C**                    **F**  
Taxi-cabs aint stopping and i dont know my way home  
                                  **G**                    **C**                    **F**  
Well it s hard to find a reason when all you have is doubts

Hard to see inside yourself when can t see your way out

Hard to find the answers when the question won t come out  
  
                  **G**                    **C**                    **F**  
Everyone s filling me up with noise i don t know what they re talking about (x3)
