```

Α
                        Bm7 A/C#
I let out the sails of my heart
                      Esus4
Here I am, here You are
F#m
                        Bm7 A/C#
I let out the sails of my heart
Here I am, here You are

[Bridge 2]
                                  Bm7 A/C# D
I've spent so many years stuck in my head
                          Esus4
Couldn't see past myself
                          Bm7
And all this time you were right here in front of me
A part of me
Esus4
              Α
Inside of me
            Bm7
                     A/C#
And patiently you spoke to me
                    Esus4
And you set me free
     F#m
                          Bm7
                                A/C#
                                        ח
So naturally I'm living from my heart
                          Esus4
I'm living from my heart
This is just the beginning
This is just the beginning Ohh
Esus4
           F#m
This is just the beginning
                Bm7
                           A/C#
Of a new way of living with you
          Esus4
With you
