you monolith not scarred by fallout  
us wolves were right behind you and lucifer will never find you  
oh no!

**C F G C**

the moon, let it guide you, when selene comes, we ll all know how to fight  
dear fenrir, my saviour, come and eat the ones, we know who taste the best

**Am** (instead of last **C**)

**F G Am G**

I know just where you ve been boy, i ve watched you by the stream  
and don t be afraid of the dark cos the darkness is simply a womb for the  
lonely  
swallow your pride and walk with us through the trees and hills  
oh yes! your english eyes they are turning red  
I I I I oh I I I I

the moon, let it guide you and i shall find you a home in our heartland, a heart  
in our homeland  
Until the moon is down, until the moon is down
