```

Volume swell or distortion on here.....

Chorus

All the choruses alternate from an E or an E minor chord to an A or A minor.

The Break

```

E| ----- |
B| ----- |
G| ---14--13--13--13--13--13--13--13--12--12--12--12--19--19--19--19 |
D| ----x---x---x---x---x---x---x---x---x---x---x---x---x---x---x---x |
A| ---12--11--11--11--11--11--11--11--10--10--10--10--17--17--17--17 |
E| ----0---0---0---0---0---0---0---0---0---0---0---0---0---0---0---0 |

```

Play that line twice.

For the part after the break, just fool around with the higher octaves and notes.

You can hear the bass playing extra notes too at the outro, if you want to play them on the guitar they re E(play open E then slide to 12th fret), A, and B

Like I said, this isn t exact because there might be more to the chords than what i put here, and Malkmus is probably tuned alternately, but these are pretty much the correct notes.

Sorry if this sucks, but when I pretend to be a rock star in my room, this is what I play when I play along with it.
