From Under Liquid Glass - Peace
Capo on 2nd Fret

Previous tab used incorrect chords for final chorus, i have included the correct chords in this tab version.

Apart from that, the Previous Tab sounded good, however i couldnt get it to sound like the record exactly.

I watched a live performance at Reading and he uses a Capo at 2nd fret and a D open chord shape for the Riff, to play the A note he moves his middle finger from the D chord shape and plays as tabbed below. The rest of the chords are played normally. Listen to record to understand strumming. During the Verse strum in bursts.
