

Sister Song
Perfume Genius

I sort of figured this out because I really wanted to learn it but couldn't find music for it anyway. I think it's basically right.

INTRO:
(this is the plinky piano part)

```

E-----|
B-5-7-9-9-7-5-5-5----5-7-9-12-12----5-7-9-9-2-2-0----5-7-9-12-12----|
G-----|
D-----|
A-----|
E-----|

```

You could add a bass note on the low E just by playing it open once at the start of every little riff. It sounds okay like, just something to play around with.

```

      E           E
Drive on, drive on
      A           E
My special one
           E           E           B
Don't you stop til you know you're gone
      E           E           A           E
Your sister and me have a set of keys
           E           B
Don't you worry your head about a thing

```

```

      E           E
Drive on, drive on
      A           E
My special one
           E           B           E
Don't you stop til you know you're gone

```

```

      E           E
Drive on, drive on
      A           E
My special one
           E           E           B
Don't you stop til you know you're gone
      E           E           A           E
Your sister and me will keep your place clean
           E           B
so it shines when you finally come home

```

E **E**
Drive on, drive on

A **E**
My special one

E **B** **E**
Don't you stop til you know you're gone

Enjoy!
