JETPACKS WAS YES! - Periphery

---

Tabbed by: Adrian Urban  
Email: -

Tuning: Standard (EADGBE) with Capo I. If your guitar is tuned a half step down (EbAbDbGbBbeb), either play this tab with Capo II or transpose it up two half steps.

**G**          **Em**          **D**  
These walls of time release  
          **Bm**                          **G**  
My eyes move like the drift  
          **Em**                  **D**          **Bm**  
The cries, they resonate within  
          **G**                          **Em**                  **D**                          **Bm**  
The fabric tears before me break ties between the kin

**G**          **Em**  
Reaching for a way out of this dream  
          **D**                          **Bm**  
I waste my breath ascending  
                  **G**  
Fears lead me astray  
          **Em**                          **D**  
The past brings them to be  
          **Bm**                          **G**  
What s left to carry me...

**Em**  
... But a memory?  
          **D**                          **Bm**  
The dream endures these lies  
                  **G**          **Em**                  **D**          **Bm**  
Forever at the edge left surviving alone

**G**          **Em**  
Reaching for a way out of this dream

**D** **Bm**  
I waste my breath ascending

**G**  
Fears lead me astray

**Em** **D**  
The past brings them to be

**Bm**  
What s left to carry me...

| **G** | **Em** | **D** | **D7M Bm** |  
| **G** | **Em** | **D** | **D7M Bm** |

**G** **Em**  
What s left as I wander

**D** **Bm** **G**  
I ve found a world where I am free

**Em** **D** **Bm** (let ring)  
Inside that which is truth

**G** **Em** **D**  
The ground upon which I have grown is not the same

**Bm**  
The fears they ve fallen away

**G** **Em** **D**  
Presently I ve found I am not alone

**Bm** **G** **Em** **D**  
In a world of infinity sewn

**Bm**  
Perceive beyond the seam

**G** **Em** **D**  
Beyond the seam

**Bm** **G**  
A soul evolves as one
