

That'll Do  
Peter Gabriel

C                    Em            F                    C  
A kind and steady heart can make a grey sky blue,  
F                                    C                    D                    G  
And a task that seems impossible, is quite possible for you.  
C                    Em            F                    C  
A kind and steady heart, is sure to see you through.  
F                                    C  
It may not seem like very much right now,  
D                    G  
It'll do, it'll do.

F                                    G  
When you find yourself in the middle of a storm,  
C                                    Am  
And you're tired and cold and wet,  
D                                    F  
And you're looking for a place that's cozy and warm,  
G                                    G  
You'll make it; you can never forget!

C                    Em            F                    C  
A kind and steady heart, can conquer doubt and fear.  
F                                    C  
A little courage goes a long, long way,  
F                                    C  
Gets you a little bit farther down the road each day,  
F                                    C            F  
And before you know it, you'll hear someone say,  
F                    C            F            C  
That'll do, Babe, that'll do.

C                    Em            F                    C  
A kind and steady heart, is sure to see you through.  
F                                    C            C            Am  
A little courage goes a long, long way,  
F                                    C            Am  
Gets you a little bit farther down the road each day,  
F                                    C            Am  
And before you know it, you'll hear someone say,  
C            F                    C            F                    C            F                    C  
That'll do, that'll do, that'll do, Babe, that'll do.
