

Carry My Soul Away
Phil Wickham

I worked out the chords from: <http://www.youtube.com/watch?v=CMasrihCvf0>

Phil has tuned a full step down. So hes playing in E, but really its D. I will include both chords, Below is standard tuning, and below that is full step down chords (like Phil is playing). I am unsure if all the words are correct, its hard to make out. Also not sure on the bridge. 17/04/2012
