

**Just A Simple Plan  
Piebald**

Preface:

This chord file is based on on the other tab for this song found on the site. I just added the

lyrics and placed the chords where my ear tells me they should go. Of course my ears aren t

perfect and neither is this file, but it should help a lot!

I indicate next to the chords whether they should be played hi or low. It should be pretty

obvious from listening to the song though.
