

Outside Love
Pink Mountaintops

Make sure to tune your guitar down a half step, the way Stephen Mcbean likes it.

These are the chords used in the song.

Chord names aren't correct, but it's easier to remember them as the G and C chord shapes and so on.

```
      G   C   D   D7  Em  Am
e|--3---0---2---2---0---0---|
B|--3---1---3---1---0---1---|
G|--0---0---2---2---0---2---|
D|--0---2---0---0---2---2---|
A|--2---3-----2---0---|
E|--3-----0-----|
```

```
  G               C
  someone told me of a dream
  D               C               G
  killed along the lost highway
  G               C
  but to me it seemed obscene
  D               C               G       D
  like satan laughed and spread his wings
```

```
  C               G
  but if I asked you what you saw
  Em               D       D7
  would you say you saw it all
  Am               Em
  angels burning in sin and flame
  C               G               D
  draped across the lost highway
```

Chorus:

```
  C               G
  don't carry your burdens to your grave
  Em               C               D       D7
  let outside love guide your way
  C               D               G       Em
  someone told me of a dre-----am
  D               C               G
  where outside love reigns supreme
```

The solo bit is played on top of the chorus chords, then the chorus is repeated. The song ends with the second half of the chorus repeated.
