Do you remember the first kiss?  
Stars shooting across the sky  
To come to such a place as this  
You never left my mind

I m watching from the wall  
As in the streets we fight  
This world all gone to war  
All I need is you tonight

And I draw a line  
To your heart today  
To your heart from mine  
A line to keep us safe

All through the rising sun  
All through the circling years  
You were the only one  
Who could have brought me here

And I draw a line  
To your heart today  
To your heart from mine  
One line to keep us safe

And I draw a line  
To your heart today  
To your heart from mine

And pray to keep us safe

Watch the stars in moving  
across the Sky  
Keep this feeling  
Safe tonight
