

Decipher Reflections From Reality
PlayRadioPlay!

[Intro: C-Em-Am-F] x2

My parachute didn't open
And when my back up failed
The pixie dust prevailed
And I woke up next to you
All I wanted was to hold you

I was born in a city
However small
It held a hospital
For location where I came into being
It was all downhill from there

What do you do-
When your life's a disaster
And you're moving faster
And it's getting harder to breathe

What do you say-
If someone is right but
You disagree
Even if it's the truth

C-Em-Am-F x2

I was told you are depressed
By a little bird

Am

That was severely hurt

F C

As it did not notice my window

Em Am F

It just flew wherever the wind blows

C

As it convulsed on the pavement

Em Am

It whispered I am hated

F C

Your genetic flaws

Em Am

I said say it all

C Em Am

You can't decipher reflections from reality

C

But neither can I

F C Em Am F

I noticed neither can I

C Em Am F

I noticed neither can I

C Em Am F

I noticed neither can I

C

You are the circle

Em

I am the square

Am

I have the non-cut

F

You have the cool hair

C

We both take showers

Em

For almost an hour

Am F

But only once a week or two

C

What do you do-

Em

When your life's a disaster

Am

And you're moving faster

F C

And it's getting harder to breathe

F C

What do you say-

Em

If someone is right but

Am

You disagree

F C

Even if itâ€™s the truth

C-Em-Am-F x2
