It's All Your Fault
P!nk

 Hey guys, this is one of my first few tabs and i would love
it if you would rate this so i know if it s accurate. :D
leave me any comments

```
     D                       A                          F#m
I d conjure up the thought of being gone
              D                     A          F#m
But I d probably even do that wrong
    D              A        F#m
I try to think about which way
                  D                A              F#m
Would I be able to and would I be afraid
 D                      A                 F#m
Cause oh I m bleeding out inside
D       A            F#m
Oh I don t even mind (yeah)

     D                A
It s all your fault
        C#                      F#m
You called me beautiful
        D                A
You turned me out

                  C#                F#m
And now I can t turn back
 D              A
I hold my breath
 C#                               F#m
Because you were perfect
            D                       A
But I m running out of air
           C#        F#m
And it s not fair
D â€"Aâ€"F#mâ€" X2
Da da dada da dada da
Da dadadadadada da dadadadadada
D                           A                    F#m
I m trying to figure out what else to say (what else could I say?)
        D                   A                            F#m
To make you turn around and come back this way
(Would you just come back this way)
```

```
    D                             A                                      F#m
I feel like we could be really awesome together
        D                         A                              F#m
So make up your mind cause it s now or never (oh)

CHORUS*

F#m                   C#
I would never pull the trigger
F#m                             D               A
But I ve cried wolf a thousand times
F#m                   C#
I wish you could
F#m
Feel as bad as I do
D                       A
I have lost my mind

      D               A
It s all your fault
        C#                            F#m
You called me beautiful
        D                       A
You turned me out
                      C#                    F#m
And now I can t turn back
    D                   A
I hold (I hold) my breath (my breath)
     C#                            F#m
Because you were perfect
                  D                           A
But I m running out of air (running out of air)
            C#      F#m
And it s not fair

(Oh yeah
It s all your fault)
    D       A
I hold my breath
      C#                            F#m
Because you were perfect
                  D                       A
But I m running out of air
                C#                        F#m
And it s not (it s not) fair
```
