Dont Give Up The Fight
Racoon

I was sort of frustrated that there weren t any good tabs of this song of the
album
Liverpool Rain on here, so I decided to try to listen to the song and figure out
what was
being played. I have the feeling this is almost 100% accurate, and if not,
please
comment below! It was a bit hard to tackle with all the changes in major and
minor. They are
subtle, but I think that they are there.

In the song, the chords aren t played by guitars (only after the last chorus),
but you
can easily play with guitar. This is actually my first tab, so I hope all makes
sense.
