Based on this video : <http://www.youtube.com/watch?v=bimJxbW0uPs>

All chords should be played as bar-chords, except E and Dm.
The transition from E to F#m goes over Fm, so it s basicaly

	E E E	Fm	F#m
e	---0-----	-----2-----	-----2-----
B	---0-----	-----2-----	-----2-----
G	---1-----	-----2-----	-----2-----
D	---2-----2-----3---4-----	-----2-----	-----2-----
A	---2---2-----3-----4-----	-----2-----	-----2-----
E	-0-x-0-----1-----2-2-----	-----2-----	-----2-----

The song switches beautifully between blues style picking and mostly-downwards-strumming, but it s rather easy to figure it out by listening to the song.

And there s also a little transition from E to A after the chorus which i can t figure out, but letting the E ring sounds good too.
