Yeah...um so this has probably been my favorite song during the past 6 months, but I d never been able to tab it the two or three times I d tried before. Today it just came to me as I was messing around on my keyboard...so here s a real simple progression that will work...finding the key was a biotch even playing along...7th probably sounds the best, but I doubt its right...I m not very good at finding song keys randomly I guess =s... Anyways, voila...4 Chords...real simple stuff. I slap the body and strings semi flamenco style when I play it so it sounds good on acoustic with or without capo, and it works for me, that s really all that matters! Hate away if you must, all you are really doing is giving me a boner...no homo! On that awkward note:

No Capo (but play same formation if using one)
