

**New Fool At An Old Game**  
**Reba McEntire**

                          C      F                          C      F  
You sure know what you re doing holding me this way  
                          C      F                          G      Am  
And I ll go where you lead me anywhere you say  
                          Am      F                          Am      C  
You ve got me where you want me, so darling please be kind  
                          F                                  G  
Before you take it all, and I make that final fall  
                          C  
You ve got to keep in mind

Refrão -----

                          C      F                          C  
I m a new fool at an old game  
                          Am      F                          G  
A kid out of school, trying to find my way  
                          F                                  Am      F  
But I don t know the rules, teach me how to play.  
                          F      Gm                          C  
I m just a new fool at an old game  
-----

Maybe I m a dreamer, or maybe I m naive  
But when you say you love me I start to believe  
That coal can turn to diamonds  
And this night will never end  
But if it isn t so, and I cry when you go  
You ve got to understand

Chorus
