

**Shes Not The End Of The World**  
**Reel Big Fish**

I thought it was embarrassing that there weren't any transcriptions out for this song, yet, so here you go! The song uses power chords the entire way through (Well, except for the first four), so just turn all the chords described here into their power chord versions and it should sound similar to the way it is in the song. I just included their full names in case someone wants to do something with that. Also, I tabbed out the riffs used during the transitions.
