

Wisteria

Richard Shindell

a few notes at the risk of being verbose:

i saw this song transcribed differently
on a website, with the capo on the 5th fret,
with the chords BmGDA, (and that s the way richard does it live
i believe) but i play along with the CD with no capo,
in the key of Em/G (i think that s right).
both ways sound right when played along with the CD,
but i like my way better.

just use an easy, free-picking style, listen to how richard plays,
and you ll see what i mean.

sorry, i don t write tab; i play by ear...

but it s really quite simple.

he adds a lot of hammer-ons and twiddly things in there.

really a pretty song.

comments, suggestions ?

feel free...

(remember this is just my personal interpretation of the song.

you don t like it, go buy the sheet music. if you can find it.)
