                                                       Cm
It s been seven long years fighting for your attention
                   Eb
Manipulated by fear
                    and misdirection
                                                         Cm
                           Eb
Wrapped in your ugly chains, swore you d rise me to heaven
Brought me nothing but pain, was that your intention?
[Pre-chorus]

Damn frustrating that you think I could never make it
Look who s standing right in front of you Yes, it s me
What you doing? Did you think you would see me ruin?
After all the shit that I ve been through
[Chorus]
I m a soul survivor, I made it through the fire
I started with nothing, I ve got nothing to lose
I m a soul survivor, I made it through the fire
I started with nothing, I ve got nothing to lose
