**Angels**
**Robbie Williams**

```
F#
I sit and wait
                      B9       B        C#
Does an angel contemplate my fate
               F#
And do they know

The places where we go
                      B9  B       C#
When we re grey and old
             G#m
Cos i ve been told
      B                      Ebm              B
That salvation lets their wings unfold
          E
So when I m lying in my bed
       B/C#
Thoughts running through my head
      F#
And I feel that love is dead
E      B/C#             F#
I m loving angels instead
               C#                       Ebm
And through it all she offers me protection
                    B
A lot of love and affection
                  F#
Whether I m right or wrong
             C#
And down the waterfall
            Ebm
Wherever It may take me
                  B
I know that life won t break me
          F#/G#                   G#m
When I come to call she won t forsake me
E           B/C#      F#
I m loving angels instead

F#                                       B9       B       C#
When I m feeling weak and my pain walks down a one way street
          F#                             B9    B          C#
I look above and I know I ll always be blessed with love
    E
And as the feeling grows
           B/C#
She breathes flesh to my bones
```

```
     F#
And when love is dead

E          B/C#        F#
I m loving angels instead
            C#                    Ebm
And through it all she offers me protection
               B
A lot of love and affection
            F#
Whether I m right or wrong
          C#
And down the waterfall
        Ebm
Wherever it may take me
            B
I know that life won t break me
        F#/G#                 G#m
When I come to call she won t forsake me

E          B/C#      F#
I m loving angels instead
