Breathe
Roger Waters

```
   C#                  F#
Breathe in the air
Eb                                        G#
Make for the meadow and savour the grass while it lasts
C#        F#
By and by
Eb                                        G#
Shadowy fingers of industry reach for the sky
C#                                     F#
Brick upon brick, stone upon stone they grow
Eb                                     G#
Choking the atmosphere oh so incredibly slowly
C#                                           F#
Sulfur and carbon and hydrogen sulphide and lime
C#                                        F#
Fever corrosion and cover your cities with grime
C#                                        F#   G#
Something is killing the land before your eyes
           C#
And the sunshine
            F#
is not to blame
                  C#                          F#
Could be the insane inhumane games we play
G#        C#
Day by day

C#               F#
Riddle and fool
Eb                                     G#
Mushrooming home in a crowd, I m alone
C#                       F#
Close your eyes lie still
Eb                                      G#
You are a mountain stream and I am a hill
C#          F#
Far, far away
Eb                                           G#
There is a field of blossom and bees and new mown hay
C#               F#
Breathe in the air  (x4)
```
