

Seven English Girls

Ron Pope

well i m supposed to be studying for exams right now so i figured this would be the perfect time to dick around and write this out. the piano chords are posted on ron pope s myspace but this is just a really simple way of playing it on acoustic guitar, in a completely different key. i play it with a capo on the third fret for my voice.

intro: **C G D Em**

C G D G (i like to add my pinky to each chord so it kind of mimicks the piano version)
