Second verse (same chords as first):

Sunday morning my town is sleeping,  
lying all alone in my bed.  
There s not a sound, I can t help but listening,  
wishing I was somewhere else instead  
but sometimes they re to hard to handle,

those voices inside my head...  
Listen now.

A                                          G                                          D  
Take a walk inside my dream: a church, a lonely road.  
A                                          D                                          A  
All the people come and go and come and go.
