[Outro]

C            Em                            G                            D            C  
This - is the time for exploration so I m not offering an excuse  
C            Am                            Em                            G  
But I m sorry the last person I wanted to disappoint was you  
C            Em                            G                            D            C  
And this is a theme song for us all some could say a redneck lullaby

If you re young and terrified and just trying to have a good time

C Am Em G
