

The Fish And The Stars Said the Whale

So this is their song from the EP Bear Bones, fantastic and heart-touching song. Its

a pretty easy going song, i play it down up up down for a strum pattern, but you

can never be taught a strum pattern, its just how it goes! At the very last two lines; strum once, to kind of wrap things up. NO CAPO, EADGBe tuning, and make sure all chords are barred except for E of course. This song will be easy for those who have learned barre chords, if you havn t, it might be a bit harder flattening out your first finger, just practice my friend. Enjoy.
