Rocket Ship
San Cisco

San Cisco - Rocket Ship
/* Capo on 1st fret */

[only drums]
I fold a piece of paper
And I put it in my pocket
Cause Iâ€™m about to board
The worldâ€™s first rocket
```
      C              G
```
And I need to remember
```
       Em        F
```
Where I came from

```
          C                  Am
```
And I leave it for as long as I can
```
    C                              Am
```
Until it falls and breaks and it crumbles like sand

C Am C Am

And we all go like
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa

```
C                        G
```
Ten nine eight seven six five four three
```
Em                          F
```
Two one: the rocket ship went off like a gun
```
C                  G           Em
```
It was nice knowing you my good friend
```
                         F
```
But I might never ever ever ever see you again

C G Em F

And we all go like
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa
```
C             Am          G       Gsus4 G
```
Ooh la la la, ooh la la la laaaaaa

```
Well they’ll look to me down to the ground
                                    C   G   Em   F
And maybe one day well I’ll be found
            C                       G
Well, we’ll sing it loud and we’ll yell it proud
      Em                  F
And maybe one day we will all be found

      C             Am          G       Gsus4 G
Singing ooh la la la, ooh la la la laaaaaa
C             Am          G       Gsus4 G
Ooh la la la, ooh la la la laaaaaa
C             Am          G       Gsus4 G
Ooh la la la, ooh la la la laaaaaa
C             Am          G       Gsus4 G
Ooh la la la, ooh la la la laaaaaa
C             Am          G       Gsus4 G
Ooh la la la, ooh la la la laaaaaa
```
