

Shotgun In My Spaceship
Sapient

<http://www.youtube.com/watch?v=tQA4QwDSjEg>

This is a love song for physics and chem nerds. Thank you, Sapient! :D

I wrote down all the lyrics and figured all the chords to my liking, but if I got anything wrong, just comment below. Any words you'd need another person to sing are in () s. I couldn't figure out the solo.

Practice the lyric rhythm a lot, then sing this to your girl. I believe in you.

- peeeace, the Wheez

[Tune all strings down a half step]

(?) = a D-shaped chord on fret 4 with pinky hammer(h)-on-pull(p)-offs
(X) = a D-shaped chord only using the top two strings and sliding it up the neck
(B7)= a weird bar. You can use any B7 you want for the other B7 s, but if you want

to do the hammer-on-pull-offs, you gotta use the one tabbed below.

* = There's a D-to-D7 chord transition thing actually happens as a triplet before

the first beat in the last measure. The paino plays it.

_ = I tried to label where the down-beats are.

	(?)	(X)	(B7)	*
E	-4-5h-5-	-2-3-5-	--2-----	-3-
B	-5-5--5-	-3-5-7-	----4-4-5h-4p-	-3-
G	-4-4--4-	-----	----4-4-----	-2-
D	-----	-----	----4-4-----	---
A	-----	-----	-----	---
E	-----	-----	-----	---
