* in the brackets you strike only one note and not a chord; you can use
the 2 finger chord instead (e.g. for B sound | | | 3 |
 -----> | 1 | | |
the note that must sound B will be 1)

* for the intro I would suggest to use this C5 chord between frets
3-5:

1st string | 1 | | |

2nd string	1	4
3rd string	1	3
4th string	1	
5th string	1	
6th string		

* for verses there s a background guitar harmony - I think it s Rudolf s)...It s like a phaser picking using the Em chord on 7th fret. You also could play these chords acoustically as well with no use of distortion. So...HAVE FUN !

PS: During the chorus, in the line A Em D Em the chord D might be wrong; it might be a F# instead...anybody who thinks is F# (same as for the bass) please let me know.
