White Horse
Scott Matthew

I didn t find the chords for this song on the internet so i thought i should figure them
out and poste them. They re not accurate, because Matthew uses difficult chords, which
are only simple for Ukulele, and because i was too lazy.

in verse: picking
in chorus: strumming every chord just once

verse 1:
```
Bm                A            G
shepherd me from pain and the doubt
through the broken streets and the hearts
herd me home through hurt and the past
then leave me alone you have no choice
```

chorus:
```
                    Em          D          G
and now there is a white horse caged in my heart
and it s going to kill me just to get out
now there is a white horse caged in my heart
and it s trying to kill me just to get out
```

verse 2: (like verse 1)
though we re different creeds, wear different masks
If you only could conceive that there s a chance
and hell is bent on showing me the dark
shepherd me to light, make it stop.
