Heartless
Seafret

[Verse 1]
```
C#                           A#m
All nights and the early morning
     F#                Db
Just damaging our health
Db                   A#m
Sunrises without warning
    F#                C#
And history repeats itself
  C#                    A#m
Last time ended so bad
A#m                                   F#          C#
Just looking for a way to get the feeling back

C#
I tried to run but didn t get far
A#m                       F#
Before I heard them calling
C#
I kissed her in a crowded bar
          A#m                       F#
Stayed the night, left in the morning
  F#
I, I wish I could stay
```

[Chorus]
```
 C#
You said you would wait
                         F#
written all over your face
F#
You re just like the rest, so heartless
C#                                         F#
I said I would wait but they keep dragging me away
F#
Different places every day
                        Fm
Why go through this?
```

[Verse 2]
```

I go running to my friends
