

Princess And The Pony  
Sean Na Na

G

G C  
I couldn't sleep so I took a pill  
D Em  
with a dirty glass of water from a low pressure hell  
G C  
Someone buy a round before my liver fails  
D Em  
and you know it will

C  
How many of you will be (Ba-Ba-Ba-Da-Ba)  
D  
left to make a scene  
G (timing is weird feeling) C  
at my funeral party  
C D  
Set my soul at ease by spinning wire  
G  
as I lay on my side  
C  
cause it's the earth which I have known since birth

Em  
So clap your hands if you wanna be  
B C  
the little princess who finally gets the pony  
D  
or the one that steals the life from me  
Em B  
With that long sleeve thrift you found in Grand Forks  
C D  
to cover up your track marks

Em B  
Cuz when you finally come down  
C  
the pony you've been riding around town  
D  
turns out to be a man

Em B C D  
And then overheated crimping iron burns your hands again

C  
How many of you will be

D  
left to drink whiskey  
G                                  C  
          at my funeral party  
C                                  D  
Remember to bring your flask  
                  G  
and pour a shot for  
                  C  
your dead homie

Em                                  B          C          D  
Shake your ass around my casket

Em                                  B          C          D  
Shake your ass around my casket

Em                                  B  
Shake your ass around my casket  
                                  C                                  D  
and bring your beach blankets

Em                                  B  
Volley balls, wine coolers  
C                                  D (End with one strum)  
          Spin your favorite records.
