Dont Make A Sound
Secondhand Serenade

Donâ€™t Make A Sound

INTRO: **C,AM,F,G** 2x

```
C                 Am        F         G
Without saying a word I can hardly breathe/
C        Am          F              G
You did that to me/ your eyes are so beautiful
                C            Am        F
Like the sea/ and theres no were else id rather
G   C     Am        F         G
Be/ but im in to deep/ that I might drowned/
C                Am      F       G      C
Safe me if you can/ Just come around/ And
      Am           F                 G
When I bleed the knife is going to seep/
C                                          Am
And then forever in the ground I will sleep/
F              G
You did this to me/ You did this to me/
```

Chorus
```
Am                           F
So donâ€™t make a sound/ I just want
          C
To sleep/ im almost dead and I already
               G
Is gonna drown/ because of what you did
        Am                  F
To me/ you broke my heart/ and through it down/
C
Then with every burst you stopped on it in the ground/
G                      Am
And I cried so many tears/ but please donâ€™t make a sound/
F                           C                G          C,Am,F,G
Cause everything I had was fears/ I bleed to many tears/ too many tears/
```

```
C           Am          F              G
I didnâ€™t wanna let you down but I cant hardly breathe/
C           Am            F              G
When your around my heart goes to the darkest place/
C        Am          F             G
Maybe we will be better next time around and I could find
C              Am       F                G
The light on your face/ but I went to bottom and im down
    C      Am        F              G
Underneath/ I can barely breathe/ I can barely breathe/
```

```
Am                                F
So donâ€™t make a sound/ I just want
              C
To sleep/ im almost dead and I already
                  G
Is gonna drown/ because of what you did
         Am                       F
To me/ you broke my heart/ and through it down/
C
Then with every burst you stopped on it in the ground/
G                             Am
And I cried so many tears/ but please donâ€™t make a sound/
F                                 C                          G
Cause everything I had was fears/ I bleed to many tears/ too many tears/
```

```
C
All the tears you made bleed/
Am
And all the knife that went in to deep/
F
To many count how they could of seeped/
G
And now im dead cause I couldnâ€™t breathe/
C                   Am                       F
I could breathe/ you made my life hell/ but
                              G
Its my fault cause you fell/ I fell/
```

Chorus

```
Am                                F
So donâ€™t make a sound/ I just want
             C
To sleep/ im almost dead and I already
                  G
Is gonna drown/ because of what you did
          Am                      F
To me/ you broke my heart/ and through it down/
C
Then with every burst you stopped on it in the ground/
G                             Am
And I cried so many tears/ but please donâ€™t make a sound/
F                                 C                          G
Cause everything I had was fears/ I bleed to many tears/ too many tears/
```

                end on c
