**F  G**  
Turn out the light,  
                  **F          G**  
just say goodnight to yourself...  
                  **F**  
may I remind you,  
                  **Am**  
when you find you,  
                  **G**  
you re all alone is when you,  
  
                  **F  G**  
you ve got to be strong  
  
                          **F                  G**  
cause that s when they call you in the night  
                  **F                  G**  
he s got your picture in his mind,  
                  **F                  Am                  G**  
he s got your number on a paper at his disposal anytime  
  
                  **F**  
is it really true,  
                  **Am                  C                  G**  
that you save yourself for someone who loves you for you?  
                  **F                  Am**  
so many times we just give it away  
                  **C                  G**  
to someone who .. someone who  
  
                  **F  G**  
you met at a bar,  
                  **F  G**  
in the back of a car  
                  **F                  Am**  
and for a moment you felt important  
                  **G**  
but not in your heart  
  
                  **F                  G**  
because my self esteem has been low,

**F**  
go ahead and count,  
**G**  
its been lower than low,  
**F** **Am** **G**  
I know the feeling of it stealing right out from under me  
**F** **Am** **C**  
I wanna learn how you save yourself for someone who  
**G**  
loves you for you,  
**F** **Am**  
so many times we just give it away  
**C** **G** **F**  
to someone who couldn't even remember your name  
**Am**  
how you save yourself,  
**C** **G**  
someone who loves you for you,  
**F** **Am**  
loves me for me, give it away  
**C** **G**  
to someone who .. someone who  
**F**  
will cherish your name (twice).
