(Verse 1)

```
          C          G
Lately I ve been, doing some thinking

          Am          G          F
I guess that it s more like the last couple years

          C          G
I never would guess, all that it s taught me

          Am          G          F
And I can t believe that it s brought me here

          C          G
I m happy that you, know where you re going

          Am          G          F
I wish I could say of myself that was true

          C          G
We both pursue, something worth knowing

          Am          G          F
But I may not end with the same thing as you
```

```

(Chorus 1)

```
          F          C          G
Wasn t there something you wanted to say

          F          C          G
About all the things that could get in our way

          F          C          G          Am          F          C          G
If I am a martyr, will you be my faith, if it s all the same
```

(Verse 2)

```

          C                G
I m counting the days, and counting the dollars
      Am          G          F
Wondering how much I m willing to spend
          C                G
To make us believe, that this is important
      Am          G          F
There s only so long that I can pretend

```

(Chorus 2)

```

          F                C                G
Wasn t there something you wanted to say
          F                C                G
About all the things that could get in our way
          F                C                G                Am          F    C    G
If I am a martyr, will you be my faith, if it s all the same
      Am
If it s all the same

```

(Bridge)

```

F                E
You could write me a letter
      Am
You re not the only one
      D
You re not the only one
          F                G                F    C    G
That feels the way that you do, cause I feel it too

```
