Not sure about intro

Verse 1:

**Bm**                    **A**            **D**  
If I saw You on the street  
**G**                                    **D**            **A**  
And You said come and follow me  
**Bm**                                    **A**            **D**  
But I had to give up everything  
**G**                                    **D**            **A**  
All I once held dear and all of my dreams

Pre-Chorus:

**D**                                    **A**  
Would I love You enough to let go  
**Bm**                                    **G**  
Or would my love run dry  
   **A**  
When You asked for my life.

Chorus:

**D**                                    **A**  
When did love become unmoving?  
**Bm**                                    **G**  
When did love become unconsuming?  
**D**                                    **A**  
Forgetting what the world has told me  
**Bm**                                    **G**  
Father of love, You can have me  
**A**  
You can have me

Then I m not losing anything  
**Bm**                                    **A**            **D**  
So I will crawl upon my knees  
**G**                                    **D**            **A**  
Just to know the joy of suffering

Pre-Chorus:

I will love You enough to let go
