

Heysatan Intro
Sigur Ros

This is a really slow and easy song to play, once you figure out how to play it.
Aside

one part (which I haven't figured out yet) it basically follows the same few tones all the song, usually in the same order.

(I didn't tab it with the rhythm and timing, but that's very easy to figure out when you to the song)

```
e-----|
B-0-----|
G-----0-----|
D-----2---0-----4-----|
A-----|
E-----|
```

It follows this a few times, then repeats the last two tones and Jónsi starts singing it does.

That's the intro and most of the song for ya.
