

True Romance
Silverstein

So here it, my first tab. I think I would have never made one, if the one which you can on this site wasn't this bad.

The only part of the song, I'm afraid could not be 100% right, is the chorus. But as I able to get the exactly right chord, I decided to insert a B, because it still allows to sing the right melody. Think just use additional notes which I'm not able to identify just by listening to the record.

The rest is definitely right - so enjoy yourself. Great song

Intro

Ebm **B**
I'm not here to judge you
